MARIS Customer Support

If you encounter technical problems or are in need of support, our experienced Support Team is available. Send us an email or give us a call, and we will do our outmost to provide you with prompt assistance.

We will do our best to identify what causes your problem, and help you fix it. If possible and required, we will arrange a service in your next port of convenience, depending on the urgency of your problem, and the availability of nearby service technician. This is always our objective.

All our service partners have dedicated service engineers who have been trained by us to perform installation, commissioning and service of our products. As a proof of their skills, they are all been given a special Certificate and an ID-card, stating the services they are entitled to perform on our behalf.

As our customer, you should always ask the visiting service engineer to identify themselves by these.
